

# HOSTIZY

• SOFTWARE FOR EVENT & DECOR RENTALS

## Run Your Whole Warehouse. *One Place.*

Inventory across every warehouse, the full booking lifecycle from quote to return, an expense calculator that shows your real margin, and GST invoices — HOSTIZY replaces the spreadsheets and phone calls your rental business runs on today.

100%

MARGIN VISIBLE BEFORE  
YOU QUOTE

### — THE OLD WAY

#### Notebooks, phone calls, and a warehouse by memory.

A booking comes in. You check stock by walking the warehouse or calling the store. Two events get the same chairs. Nobody knows the real cost of a booking until the season is over.

- ✗ Same item quoted to two events at once
- ✗ Stock spread across warehouses, untracked
- ✗ Margin known only after the event is done
- ✗ Invoices and receipts written by hand

### — WITH HOSTIZY

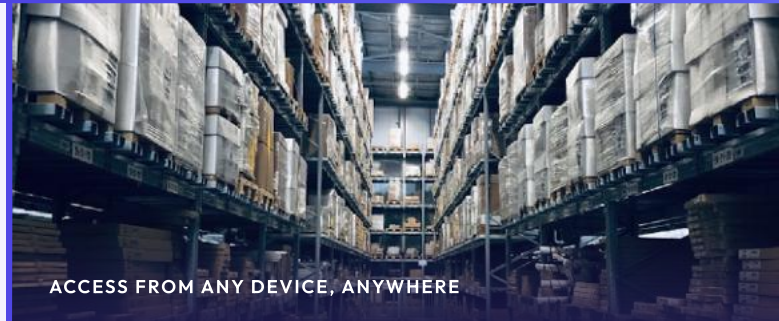

#### One stock count, one calendar, margin before you quote.

Every item lives in one system across all your warehouses. Bookings run through dispatch, return and close with nothing double-booked, and the expense calculator shows your margin before you send the quote.

- ✓ Live stock across every warehouse at once
- ✓ Availability checked before a quote goes out
- ✓ Margin shown before you commit to a price
- ✓ GST invoice raised the moment a booking closes

## Every item you own, *counted once, everywhere*

Sofas, lighting rigs, tenting, crockery — categorised, priced, and tracked across every warehouse as one stock count. Move stock between locations and the system knows where everything is.

ACCESS FROM ANY DEVICE, ANYWHERE

### 01 · ITEM CATALOGUE

#### Every Piece, One Record

Name, category, rental rate, condition and photo for every item you rent out — chairs, tables, decor, lighting, tenting — organised so nothing is remembered by memory alone.

- Organise by category — decor, lighting, furniture
- Photo and condition notes on every item
- Rental rate set once, used on every booking
- New items go through an approval step
- Full history of every change to a record

CHAIRS · DECOR · LIGHTING

### 02 · MULTI-WAREHOUSE STOCK

#### One Count, Every Location

Run more than one warehouse or storage yard and HOSTIZY treats them as a single tracked stock — so you always know which location actually has the item you just quoted.

- Each warehouse holds its own item list
- Total availability rolls up across all of them
- Transfer stock between warehouses in one move
- Adjust counts after a damage or loss
- See every stock move, not just the total

MULTI-SITE · ONE VIEW

### 03 · STOCK MOVES & HISTORY

#### Know Where Everything Went

Every transfer, adjustment and dispatch is logged against the item, so if a chair goes missing you know exactly which booking it last went out on.

- Full log of transfers between sites
- Adjustments recorded with a reason
- Trace an item back to its last booking
- Spot shrinkage before it becomes a pattern
- One screen for the whole movement history

TRANSFER · ADJUST · TRACE

### 04 · BULK IMPORT

#### Bring Your Old List In

Already keep inventory in Excel? Import your whole catalogue in one upload using a template built for exactly your columns, instead of re-typing every item.

- Download a ready-made import template
- Upload hundreds of items in one pass
- Categories created automatically as you go
- Review before anything goes live
- No re-typing your existing catalogue

EXCEL · ONE UPLOAD

### 05 · AVAILABILITY CALENDAR

#### See What's Free, Before You Quote

A live calendar shows every item's bookings at a glance, so you can promise a date to a client with confidence instead of checking three notebooks first.

- Every booking shown against its items
- Spot a clash before you confirm a date
- Filter by warehouse or category
- Plan pickup and return around the calendar
- One glance answers "are we free that day?"

LIVE · CLASH-FREE

### 06 · CATEGORIES & SECTORS

#### Built for Every Kind of Event

Weddings, corporate launches, birthdays — set up categories that match how your business actually rents, so the catalogue reflects your sectors, not a generic template.

- Categories you define, not a fixed list
- Filter the whole catalogue by category
- Different rates per category if you need them
- Report on which category earns the most
- Reorganise any time without losing history

FULLY CONFIGURABLE

## — EVERY BOOKING, ON ONE TIMELINE

Dispatch and return can be logged from a **kiosk at the warehouse gate** — no office laptop needed — and every line item is checked back in before a booking is allowed to close.

### 07 · DISPATCH & RETURN

#### Every Line Item, Checked

Dispatch a booking and each line is marked out; log the return and each line is checked back in, so a partial return never slips through unnoticed.

- Dispatch marks every line item as out
- Return checks each line back in individually
- Partial returns flagged, not lost
- Transfer items between bookings if needed
- Print a dispatch or return slip on the spot

DISPATCH · RETURN · VERIFIED

### 08 · WAREHOUSE KIOSK

#### Dispatch From the Gate

A simple kiosk screen at the warehouse lets loading staff confirm dispatch and return without needing a full office login — fast enough for a truck waiting at the gate.

- Runs on a tablet at the warehouse entrance
- No office credentials needed to use it
- Confirms both dispatch and return on the spot
- Keeps the office system in sync instantly
- Built for a truck that can't wait

TABLET · NO LOGIN NEEDED

### 09 · EXPENSE CALCULATOR

#### Know Your Margin Before You Quote

Weigh a booking's quoted revenue against the real item cost — transport, labour, breakage risk — so you see the actual margin.

- Revenue vs item cost, side by side
- Add transport, labour and other line costs
- Margin recalculates as you adjust the quote
- Save a snapshot to compare bookings later
- Admin-only, kept separate from the client view

REVENUE VS COST

### 10 · BOOKING LINES

#### One Booking, Every Item on It

Every chair, table and light against a single booking, priced and quantified per line — so a booking's true content is clear at a glance, not spread across notes.

- Add any number of items to one booking
- Quantity and rate set per line item
- Edit a booking without losing its history
- Cancel or close from the same screen
- See the full line list on the printed slip

ITEMISED · EDITABLE

### 11 · GST INVOICING

#### A Proper Invoice, Automatically

Close a booking and its GST invoice is ready — correct numbering, your business details, downloadable or printable straight from the booking record.

- Generated the moment a booking closes
- Correct sequential numbering maintained
- Download as PDF or print directly
- Your business name and GSTIN included
- Ready to hand to your accountant as-is

GST COMPLIANT · AUTO

### 12 · STAFF ACCESS

#### The Right Access, Per Role

Give warehouse staff dispatch and return access without handing them pricing or billing — permissions are set per user, so the kiosk stays simple and the office stays in control.

- Permissions set individually per staff member
- Warehouse staff never see pricing or billing
- Owner controls who can close a booking
- Add or remove access as your team changes
- Every action still tied to the user who did it

ROLE-BASED ACCESS

| TASK                        | THE OLD WAY                            | WITH HOSTIZY                                  |
|-----------------------------|----------------------------------------|-----------------------------------------------|
| Checking availability       | Walk the warehouse or call around      | ✓ One calendar shows every item's bookings    |
| Dispatching an order        | Load the truck, hope nothing's missing | ✓ Every line item checked out at the gate     |
| Pricing a booking           | Guess the margin, find out later       | ✓ Margin shown before the quote is sent       |
| Tracking stock across sites | Separate lists per warehouse           | ✓ One stock count across every location       |
| Raising an invoice          | Type it by hand once the event is over | ✓ GST invoice ready the moment it closes      |
| Helping a client mid-event  | Dig through paper for their booking    | ✓ Support ticket tied straight to the booking |

13 · SUPPORT TICKETS

Help Requests, Not Lost Messages

Clients and staff raise a ticket instead of a scattered call or message. Assign it, reply on the thread, and track status until it's resolved.

- Every request logged, not lost in chat
- Assign a ticket to the right person
- Status tracked from open to resolved
- Full reply thread kept on the record
- Clients see progress without calling in
- Nothing depends on one person being reachable

14 · PAYMENTS

Collect Online or at the Counter

Take payment through a secure online gateway, or record cash and offline transfers taken at pickup — either way the booking and invoice stay in step.

- Secure online payment gateway built in
- Record cash or offline transfers too
- Booking status updates with the payment
- Promo codes applied at checkout on offers
- Payment status visible on the booking screen
- Works alongside your existing payment habits

15 · PAY-PER-DAY LICENSING

Only Pay for the Days You Run

Your licence renews for exactly the days and users you choose — no fixed monthly tier to outgrow or overpay for during a slow season.

- Renew for any date range you choose
- Base rate covers your first users, scale up anytime
- Quote shown before you confirm renewal
- Pay online, licence activates instantly
- No fixed tier to grow into or shrink out of
- See the exact cost before you commit

16 · LIVE DASHBOARD

Today's Business, At a Glance

Bookings dispatching today, items due back, and pending payments — all visible the moment you log in, without opening five different screens.

- Today's dispatches and returns up front
- Pending payments flagged for follow-up
- Status counts refresh as bookings move
- No counting anything by hand
- The first screen you see after logging in

17 · DATA SNAPSHOTS

A Safety Net for Your Records

Snapshots of your bookings and inventory are kept so a mistaken edit or an accidental deletion is never the end of the story.

- Point-in-time snapshots of your data
- Recover from an accidental change
- Kept separate from your daily working data
- Peace of mind without extra effort
- Nothing extra to configure or remember
- Runs automatically in the background

18 · ACCESS CONTROL

Every Role, Its Own View

Set exactly what each user can see and do — the warehouse team dispatches and returns, the office handles pricing, and only the owner touches billing.

- Permissions configured per user, not guessed
- Warehouse staff never touch pricing or billing
- Owner-only controls for licensing and payouts
- Change a role's access any time you need
- Kiosk stays simple, office stays in control

“ Every item accounted for. Every booking, profitable.

ALSO INCLUDED · CALENDAR VIEW · PROMO CODES · IN-APP HELP

# Pay for what you use. *Nothing more.*

## BASE RATE

**₹99** / day, includes 3 users

Your licence is billed for exactly the days you choose — a weekend event, a busy month, or a full year — never a fixed monthly tier you outgrow or overpay for in the off season.

## EXTRA USERS

**₹39** / day, per additional user

Add warehouse staff, office coordinators or an accountant only for the days you need them covered — the licence quote updates automatically as you add each one.

| EXAMPLE RENEWAL | A weekend event | Peak season month | Full year, small team |
|-----------------|-----------------|-------------------|-----------------------|
| DURATION        | 3 days          | 30 days           | 365 days              |
| USERS INCLUDED  | 3               | 3                 | 3 + 3 extra           |
| APPROX. COST    | ₹2**<br>+ GST   | ₹2,***<br>+ GST   | ₹7*,***<br>+ GST      |

### Online Payment Gateway

Pay securely and your licence activates the moment payment clears.

### Renew for Any Date Range

Pick exactly the start and end date your business needs covered.

### Auto GST Invoice

A proper GST invoice is created on every renewal. Download any time.

### Instant Activation

No follow-up calls. Your licence goes live the moment payment is confirmed.
